

COTE D'IVOIRE

Indicators	Relevant Commodity	Description	Source
Agricultural indicators			
Production of cocoa (t)	Cocoa	The national cocoa production is distributed among the departments according to their suitability.	Abu et al., 2021 https://www.sciencedirect.com/science/article/pii/S1470160X21005288
Cocoa yield (t/ha)	Cocoa	Average departmental soy yield per year in tonnes per hectare. The cocoa yield was calculated by dividing the production of cocoa per department by the cocoa area.	Abu et al., 2021 https://www.sciencedirect.com/science/article/pii/S1470160X21005288
Cocoa area (ha)	Cocoa	Area of land being used to produce cocoa.	Abu et al., 2021 https://www.sciencedirect.com/science/article/pii/S1470160X21005288
Product	Cocoa	Cocoa products classified according to their HS codes.	Per-shipment trade data (see SEI-PCS Cote d'Ivoire cocoa v1.0 data sources and methods document).
Actor commitments			
Zero-deforestation commitment	Cocoa	Commitments traders have made to zero-deforestation across their global supply chains.	Commitments made public on company websites and data collated by the Forest 500 (forest500.org).
Cocoa traded under zero deforestation commitment (%)	Cocoa	Percentage of the exported cocoa that is exported by a trader with a zero-deforestation commitment, including traders with commitments to zero deforestation across their global supply chains.	Calculated from the zero deforestation commitments in the soy supply chain and data collated by the Forest 500 (http://forest500.org/).
Contextual layers			
Ecoregions		Boundaries of the four ecoregions in Cote d'Ivoire.	The Nature Conservancy (http://maps.tnc.org/gis_data.html).
